

that was used to help us recover the remains of the TWA 800 crash off of Long Island in New York.

We were able to get that technology through the generosity of the New York Police Commissioner, Howard Safir, to have it sent up to the lake to look to see whether or not we could in fact locate this boy's body. A couple of suspected sightings were made, but we could not complete a dive to determine whether or not it was a positive find. They came back and were unsuccessful.

In June, I followed up with the Woods Hole Laboratory in Massachusetts and asked them to assist, and we identified perhaps the top national experts on deep dives relative to drownings.

We assembled a team that in the last week of August was able to travel to Auburn, NY, to put together on the water a team consisting of four boats, all volunteers during their time, to try to locate this young man's body.

□ 2330

The head technologist for this whole operation was Butch Hendrick, the president of Lifeguard Systems, Inc. of Hurley, NY, who is an expert in locating people in these kinds of situations and dealing with drownings. We also had an expert in terms of reading side scan sonar, Brett Phaneuf, from Marine Sonic Technology who also donated his time.

I spent the first 3 of the 5 days on the lake with this team, along with the very courageous volunteer firefighters from the Owasco Fire Department. Five of them spent the entire week away from their jobs volunteering the entire day each day to help us go back and forth across the 1,000-by-2,000 foot area of this lake and the lake was 1 mile wide and 14 miles long, trying to use this technology to determine whether or not we could find this young 19-year-old. I had to leave New York on Wednesday. On Thursday, three specific sightings were made, the markers were identified, and on Friday we brought in a dive team from Buffalo, NY, the Buffalo Industrial Diving Co. headed up by Mark Judd, four divers prepared to go down 150 feet. We had a decompression chamber on standby, a helicopter to take the divers if they should have problems. On the first dive, they recovered the body of 19-year-old Nathan Swymer and brought him back up and were able to reunite him so that his family could have a proper, decent burial.

Mr. Speaker, this story would not have been a success were it not for the cooperation of a number of very unselfish people, people who volunteered their time and their expertise to see if we could use a military technology to assist us in a very emotional situation involving the loss of someone's loved one.

The importance here, Mr. Speaker, is not that we just were able to locate Nathan Swymer 7 months after he fell off that row boat in Lake Owasco, but the technology that can be used across

this country, in lakes, in rivers to assist us in similar types of operations and to avoid, where possible, the exposure to losing additional lives to send down to recover people who in fact have been drowned.

In fact, Mr. Speaker, over the past several years, it is my understanding that we have begun to lose more and more people in the rescue efforts to bring people who have drowned back than we should, and that is partly because we have not used appropriate technology to assist us in that process.

It will be my hope over the next several months to put together a congressional hearing where we can showcase this technology, where we can make the case that these kinds of technologies should be made available and that we should assist in that technology transfer process to departments across this Nation who have similar situations with deep lakes and with rivers so that we do not have to jeopardize additional lives in going down to recover our loved ones.

I particularly want to thank the gentleman from New York [Mr. WALSH] whose district Auburn and Lake Owasco is in. He has been very cooperative throughout this entire process and he was very supportive of our effort the last week of August.

I also want to thank Bill Andahazy, who is a consultant from Woods Hole who donated his time, Capt. Don Swain from the New York State Police and his team and all of those other individuals, the volunteer firefighters, the divers, the technologists who assisted us in closing this very difficult chapter in the lives of the Swymer family from Chester County, PA.

I want to encourage our colleagues, Mr. Speaker, to work with me, to see where we can find not just this kind of technology to use for commercial purposes but to see where we can take similar initiatives and assist us in solving day-to-day problems that face the people of this great Nation.

For the record, Mr. Speaker, I include the list of the Owasco Lake search team and thank them for their tireless efforts in this operation. A number of companies and individuals in the Philadelphia area donated over \$10,000 along with the Chester County Chamber of Commerce to help us defray the costs of transporting the equipment to that lake. All of the individuals that were there donated their time. The money that we raised was used to defray the costs of the transportation of that equipment to the site to allow us to complete the rescue mission.

Mr. Speaker, I thank all of the staff who stayed this late hour for this special order.

OWASCO LAKE SEARCH TEAM

Rep. Curt Weldon, Member, US House of Representatives

Rep. Robert J. Flick, Pennsylvania House of Representatives

W.J. (Bill) Andahazy, Independent Consultant

Capt. Donald Swain, Zone 2 HQ, New York State Police

Trooper David Hartz, Troop E, NY State Police

Trooper Karl Bloom, Troop E, NY State Police

Walter (Butch) Hendrick, President, Lifeguard Systems Inc., Hurley, NY

Andrea Zaferes, Lifeguard Systems

Craig Nelson, Lifeguard Systems

Lt. David Holland, Inst. of Environmental Medicine, Canadian Navy

Brett Phaneuf, Marine Sonic Technology, White Marsh, VA

Mark C. Judd, Buffalo Industrial Diving Company, Buffalo, NY

Andy Anderson, Buffalo Industrial Diving

Brad McCullum, Buffalo Industrial Diving

Brad Knight, Buffalo Industrial Diving

Tom Burns, Chief, Owasco Vol. Fire Co.

Joe Head, Assist. Chief, Owasco Vol. Fire Dept.

Tom Morgan, Assist. Chief, Owasco Vol. Fire Dept.

Tim Burns, Owasco Vol. Fire Dept.

Angelo Massina, Owasco Vol. Fire Dept.

Peter Pinckney, Sheriff, Cayuga County

Jim Tabor, Under Sheriff, Cayuga County

Gene Stiver, Dep. Chief of Navigation, Office of the Sheriff, Cayuga County

Chris Petrus, Navigation Deputy, Office of Sheriff, Cayuga County

Rev. and Mrs. (Dick and Pat) Streeter, Clergy and friends of Mr. and Mrs. Swymer.

Members of the Chester County Chamber Business and Industry Council.

Note that many other individuals also helped and offered services such as Alice Hamill of Mayflower Movers, King of Prussia, PA (although their services were not needed). The Holiday Inn Hotel, Auburn, NY staff worked with us on local arrangements as well as the Lake residents who let us use phones, water, etc. This operation was a community coming together that generated a successful conclusion to this tragedy.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Ms. PRYCE of Ohio (at the request of Mr. ARMEY) for today after 12 noon and the balance of the week, on account of attending her son's wedding.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. PALLONE) to revise and extend their remarks and include extraneous material:

Mr. UNDERWOOD, for 5 minutes, today.

Mr. GREEN, for 5 minutes, today.

(The following Members (at the request of Mr. HULSHOF) to revise and extend their remarks and include extraneous material:)

Mr. PORTER, for 5 minutes, today.

Mr. HUNTER, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. PALLONE) and to include extraneous matter:)
